USIS063118

-How do you prefer to meet new friends?

- a. Through social networks b. Knowing yourself personally

-If you need a medical consultation for x reasons, how would you like to be seen?

- a. Face-to-face medical consultation with doctor b. Video call with the doctor from home

-How do you prefer meetings with your group of friends to be?

- a. In-person meetings b. Virtual meetings (Video calls or other communication tool)

-For you, how would you prefer to receive your university classes?

- a. Face-to-face classes b. Virtual classes

-How do you socialize more with people

- a. Through social networks b. Getting to know each other when I go out to town c. Didn't socialize with many people

-Do you think technology will end up replacing face-to-face communication entirely

- a. Si b. No c. Possibly

-If augmented reality calls became a reality, do you think it would be a good replacement for face-to-face communication?

- a. Yes b. No c. Possibly

-Do you consider it necessary to meet someone in person to establish a friendship or is it enough to know each other through social networks

- a. Just meet in person b. Only on social networks c. Both are necessary

-How do you prefer to communicate with the people you know?

- a. Communication by Social Networks b. Face-to-face communication

-What way of communication do you think is best?

- a. Face-to-face communication b. Electronic Communication

Conclusion

After passing the survey with my classmates, the graphs of the answers have a tendency that my classmates prefer more face-to-face conversation, apparently it is always preferred to meet friends with everyone in the same place, even having the virtual communication technologies, still does not overcome face-to-face meetings. It should be noted that although face-to-face communication is preferred, the graph shows that most of my colleagues do not socialize much, it is not to meet new people very often. So in conclusion, a preference for face-to-face communication is maintained.
